Experience

Associate Devloper, The Ideaz Factory - Chandigarh, IN

Aug, 2023 - Present

- Led the UI development of 6 full-scale projects, handling both structure and execution. Enhanced frontend performance through code-level optimization, boosting speed by 4x.
- Built a CMS using React, Next.js, and MUI with full CRUD for blogs, videos, polls, galleries, e-newspapers, and audio. Enabled real-time frontend sync and 3x faster load times across all content types.
- Implemented code-level SEO by optimizing meta tags, semantic HTML, and overall performance. Boosted website visibility and organic traffic by up to 40%.
- Collaborated with UI/UX team to deliver user-friendly interfaces and translated complex designs into responsive code, boosting project creation speed by 25%.
- Integrated a news visibility control within the CMS, enabling editorial teams to manage content visibility. This streamlined content publishing efficiency by 30% through flexible control over live news display.

Management Trainee, SMS Group - Gurugram, IN

Jan, 2023 - July, 2023

- Gained hands-on experience with Grafana by visualizing integrated circuits data for real-time monitoring and analysis.
- Created and published two specialized plugins—a custom bar graph and heat map—contributing to the official Grafana plugin repository.
- Built a React.js web application to present comprehensive project data in tabular form, enhancing accessibility and improving user navigation by 35%.
- Crafted the mobile app UI using Swift and Xcode, delivering a seamless and engaging user experience that elevated user satisfaction by 30% through close collaboration with the development team.

Projects

News Platforms Development

Lead Frontend Developer | Next.js, MUI, Node.js

Led the frontend development of digital platforms such as [News Arena India](#) (English news), [Khabargaon](#) (Pan-India Hindi news), [News 4 Himachal](#) (Regional Hindi news), [Jist](#) (video blog platform), [GovernBetter](#) (governance and policy insights), and [ShynaGupta](#) (personal portfolio and blog)—building responsive, SEO-friendly, and performance-optimized websites with code-level enhancements for faster load times and smoother user experience.

Global Election AI Tracker – [FutureShift Labs](#)

Frontend Developer | Next.js, MUI

Built a responsive, performance-optimized platform to track global elections using AI insights, featuring real-time data and interactive visualizations.

Custom CMS Platform

Frontend Developer | React.js, Next.js, MUI

Developed a modular CMS with full CRUD functionality, enabling real-time frontend synchronization and flexible content visibility controls.

Tech Stack

Languages - Javascript, TypeScript, HTML, CSS, Swift

Technologies - Next.js, React.js, MUI, Tailwind, Grafana, Github
